Frontend • HTML5 • CSS3 • JavaScript (ES6+) • Vue.js • Bootstrap • Responsive Design • Chart.js	Backend • PHP • Laravel • MVC Architecture • RESTful APIs • Authentication & Authorization	CMS • OctoberCMS • Twig • Plugin Development	Tools • Git • GitHub • Postman • Composer • npm • VS Code
Database • MySQL	Deployment • Hostinger • cPanel		

Experience

- Full Stack Web Developer Intern
Blue Company | 2024 – 2026
- Developed Laravel-based RESTful APIs consumed by Vue.js frontends across multiple internal projects.
 - Built responsive Vue.js interfaces with Sanctum authentication and role-based access control.
 - Designed relational database schemas supporting multi-table business logic for project management and job-matching systems.
 - Collaborated using Git across feature branches, with hands-on debugging and testing of production systems.

Projects

Job Matching Platform

Full-stack recruitment platform built with Laravel and Vue.js that connects job seekers with employers.

- Developed a system for job posting, application submission, and candidate management.
- Built separate dashboards for employers and applicants.
- Implemented advanced filtering and job search functionality.
- Created RESTful APIs using Laravel and integrated them with Vue.js frontend.
- Designed a responsive and user-friendly SPA interface.

Tech Stack: Laravel, Vue.js, MySQL, REST APIs
